There are many issues I have with Microsoft however one sticks out. I do not want Microsoft's Internet Explorer. As a consumer, I feel it and it's Outlook mail system are garbage. Why does my machine have to have these programs? As a consumer, it is almost impossible to buy a Windows operating system and not be forced to have these products. Clearly MS is in an unfair competitive position causing harm to firms like Netscape and Qualcomm. Thank you, Scott Rockwell 408-360-0351
